About Me

Full stack developer looking to continue to develop my skills. I have spent the last 8 months learning full time under the guidance of experienced engineers. I am easily trainable and adapt very well to new experiences.

Skills

Frontend: Vue | JavaScript | CSS | HTML
Backend: Node.js | Express.js | Python
Other: Git | Postgres

Projects

E-shop   Github: github.com/MrButak/e-shop   Deployed: salem-smoothies.herokuapp.com

About: Full-stack e-commerce website which accepts payments via stripe, sends confirmation e-mails, and integrates a postgres database to update menu items and store order information.

Technologies: Frontend: Vue, Javascript , CSS, Backend: Node.js, Express, Postgres, Stripe API

Message Board   Github: github.com/MrButak/stories   Deployed: mrbutak-story-app.herokuapp.com

About: A server side rendered, message-board style app with login, user sessions, and an integrated postgres database.

Technologies: Backend: Node.js, Express, Postgres
